

# What is a Modern Employee Intranet?

A modern Employee Intranet is a cloud-based, employee engagement platform that transforms company culture. Here is a quick guide on what a modern intranet should include.

## Employee Communication and Engagement

Give your greatest asset the tools to connect, engage, and communicate simply with Workmates.

### Personalized Newsfeed

A single hub any user can use to communicate about anything happening at your company

### Company Announcements

Important updates and announcements to the entire workforce

### The Company Directory

Share personal and company information with the company directory

### Org Chart

Highly visual org chart to let any employee see the entire or just their part of the workforce

### Communication Options

Use Workmates' internal messaging or integrate with other communication apps already being used

### Calendar View

Know who's in the office and who's out, company events, upcoming dates and other vital information

### Information Access

Create personalized, controlled, and localized engagement groups by the employee's role, location, and more

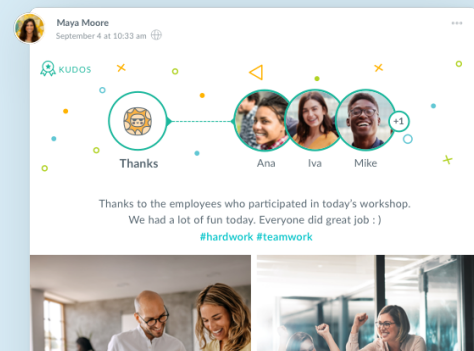

### Employee Engagement

Polls, social feeds, surveys, peer recognition, and more

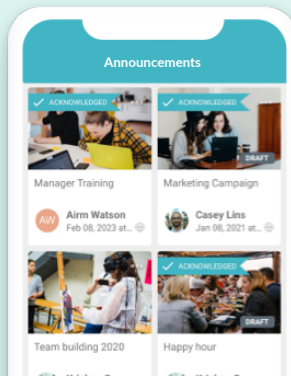

## Recognition and Reward

Allow for Peer-to-Peer virtual high-fives and shout-outs with Kudos. They can be displayed in the newsfeed with branded Badges. Top kudos recipients are showcased in a prominent Leaderboard. Kudos can be linked to rewards. Employees earn points and can redeem them for Rewards that have been approved by the company.

## Employee Intranet

Improving employee communication across your organization is easier than you think. Workmates intranet software is built to help employees connect across various departments and to simplify communication in the workplace.

### Powerful Analytics

See your most active users, contributors, viewers, and content assets

### Content Management

A document and video library which can be shared instantly with the staff

### Mobile Employee App

Connects remote or deskless workers who have no access to a computer or email

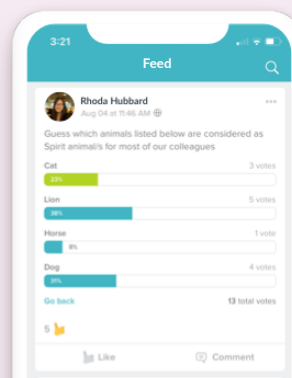

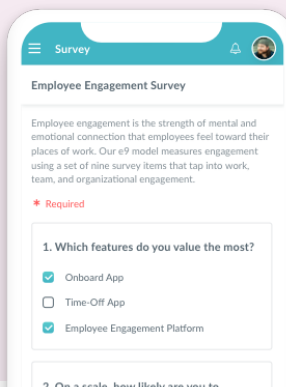

### Part of the ADP Interface

Integrates with their ADP platform as well as can be integrated with other apps they are using

## Employee Feedback

Happy employees will be willing to promote the company's best interest inside and outside of the workplace.

### Two-Way Communication

Top-down communication as well as allow for employee's response and feedback

### Polls

Give employees a voice and hear what they have to say

### Surveys

Create custom and automated employee surveys

*"One of the biggest benefits from using HR Cloud Workmates platform is that our associates can comment, react, and provide feedback directly through the platform from their smartphone or desktop devices."*
